

# NLP Projects

Natural Language Processing (NLP) is a technique for deciphering and manipulating human language using algorithms. One of the most widely used fields of machine learning is this technique. You will gain knowledge of various NLP frameworks like SpaCy, NLTK, Torchtext, TensorFlow, Keras, hugging face, etc., and their project implementation. Study transfer learning in NLP - BERT family and many more.

## Instructors:

### Sourangshu Pal:

Visual Computing Engineer and instructor at iNeuron.ai having 3 years of diverse experience in the discipline of visual computing with specialization in Deep Learning and Computer Graphics. Loves to analyze, process, and model visual data then interpret the insights to create actionable plans for solving challenging business problems.

- github: <https://github.com/sourangshupal>

## Curriculum:

- Creating rest API's
- Project building
- Real-time projects
- Application workflow

## Requirements:

- Prior understanding of NLP

- A system with internet connection
- Your dedication
