

Full Stack Data Science BootCamp 2.0

This Full Stack Data Science Bootcamp 2.0 course is designed to provide students with a comprehensive understanding of the core concepts, techniques, and tools used in data science. Throughout the course, students will learn the skills to extract data insights, build predictive models, and communicate their findings effectively. Students will be introduced to the fundamentals of data science, including data cleaning, exploration, and visualization. They will also learn about probability and statistics, and how to apply statistical concepts to analyze data. Students will learn about machine learning techniques, including supervised and unsupervised learning. They will learn how to build predictive models using regression, classification, clustering, and dimensionality reduction. By the end of this course, students will have a strong data science foundation and be equipped with the skills and knowledge needed to work with data in a wide range of industries. They will also have a portfolio of projects to showcase their skills to potential employers.

Instructors:

Sunny Bhaveen Chandra:

Sr. Data Scientist and lecturer at iNeuron.ai with working experience in computer vision, natural language processing and embedded systems. Hands-on experience leveraging machine learning, deep learning, transfer learning models to solve challenging business problems. Also, he has a vast interest in Robotics.

Sunny Savita:

I'm an AI enthusiast, graduate in Computer science and engineering. Currently working with iNeuron.ai as a Data Scientist and having 2+ years of experience. I have skills in big data, machine learning, computer vision, Natural language processing. My expertise also includes project design development and implementation with AIOps tools.

Curriculum:

- Python
- Stats
- Machine learning
- Deep learning
- Computer vision
- Natural language processing
- Data analytics
- Big data
- ML ops
- Cloud
- Real Time projects

- Architecture
- Domain wise project
- Databases
- Negotiations skills
- Mock interview
- Interview preparation
- Resume building after every module

Requirements:

- System with minimum i3 processor or better
- At least 4 GB of RAM
- Working internet connection
- Dedication to learn
