

Machine Learning Community Class

This free course on machine learning is designed to provide beginners with a comprehensive introduction to the fundamental concepts and techniques used in this exciting field. The course covers topics such as supervised and unsupervised learning, linear regression, decision trees, and clustering. Through a combination of video lectures, interactive exercises, and real-world examples, students will gain a solid understanding of the principles of machine learning and how they can be applied to solve complex problems.

Instructors:

krish naik:

Having 10+ years of experience in Data Science and Analytics with product architecture design and delivery. Worked in various product and service based Company. Having an experience of 5+ years in educating people and helping them to make a career transition.

Curriculum:

- Master Machine Learning on Python
- Supervised Learning
- Classification Algorithms
- Regression Algorithms

Requirements:

- Dedication
- Internet Connection
